- The Government revised 2011 growth forecast for the Singapore economy to 5.0% to 6.0%, down from 5.0% to 7.0%
- With increased uncertainties in the global markets, the Government has indicated that the Singapore economic growth could be lower than expected.
- The Group is watchful of the global economic situation as any adverse news will impact market sentiment.

- For the first time, Residential Property Price Index surpassed the 200 points mark to 203.0
- Overall, prices of private residential properties increased by 2.0% quarter-on-quarter in Q2 2011 – 7th consecutive quarter of moderation
- The positive take-up rate in Q2 2011 was probably due to lag time and committed sales
- From recent GLS tenders, prices appeared to have moderated as developers are more conservative and selective in their tendering, balancing supply and demand
- Developers will be mindful of market appetite and decide the timing of their launches, and when to purchase or tender for sites.

- Notwithstanding the volatility in the global economic situation, on the back of a positive GDP forecast of 5.0% to 6.0%, the office sector in Singapore is expected to remain steady and healthy

MARKET OUTLOOK

Hotels

- In 1H 2011, M&C had strong RevPAR growth in gateway cities like London, Singapore and New York.
- Singapore continues to enjoy strong growth in visitor arrivals, resulting in strong performance across M&C's Singapore hotels
- As the economic outlook remains uncertain, M&C will adopt a cautious approach
- M&C has a strong balance sheet with 60% concentration of earnings from the Asian region – will protect it from the financial storm
- M&C has proven abilities in cost control and revenue management has enabled it to be resilient amidst short term trading challenges
